PROFESSIONAL SUMMARY

Motivated Electrical and Electronics Engineering student at Meenakshi College of Engineering with interests in Power Systems, Electric Vehicles, IoT, Automation, and Embedded Technologies. Passionate about solving real-world engineering challenges through innovative and sustainable solutions. Seeking internship opportunities to apply technical knowledge and contribute to impactful engineering projects.

EDUCATION

B.E. Electrical & Electronics Engineering

Meenakshi College of Engineering (Anna University)

Expected Graduation: 2029

TECHNICAL SKILLS

Core Electrical: Circuit Analysis, Electrical Machines, Power Systems Fundamentals, Renewable Energy, Electrical Measurements

Technology: Python, AI-Assisted Development, IoT Concepts, Embedded Systems Fundamentals

Tools: GitHub, Replit, Lovable, Emergent, Microsoft Excel, PowerPoint, Word

PROJECTS

OneSwap – Student Resource Sharing Platform

Designed and developed a prototype platform that enables students to share academic resources efficiently using AI-powered development tools.

IoT-Based Home Energy Monitoring System (Concept)

Contributed to the design of an affordable IoT solution focused on reducing household energy waste and promoting energy-efficient practices.

CERTIFICATIONS & RECOGNITION

- Creative Thinker Award – Stravex'26 Hackathon
- Active participant in engineering workshops, hackathons, and innovation events

LEADERSHIP & CAREER GOALS

- Exploring EV charging infrastructure and smart energy systems
- Building expertise toward GATE EE 2029
- Interested in internships related to Power Systems, IoT, Automation, and Electrical Engineering

LANGUAGES & INTERESTS

Languages: English, Tamil

Interests: Power Systems, Renewable Energy, Electric Vehicles, IoT, Automation, Embedded Systems, Defense Technology
